DISPENSING SYSTEMS

NEW PRODUCT INTRODUCTION

These Hydro dispensers are an economical way to dispense a wide variety of automatically diluted solutions into spray bottles, buckets or other containers at the touch of a button. Dilution is controlled by drawing chemical through metering tips of varying size and injecting this metered amount into the water flow.

- **Features:**
 - State of the art water valve technology
 - Linkable inlet and outlet fittings
 - Each standard button can be converted to lockability
- **Benefits:**
 - Low cost, consistent performance, and reliable service
 - Create larger systems by simply joining the units together
 - Customize standard systems to individual needs
