Paint Correction Products

A new generation of high performance detail products

Paint correction is the process of removing the imperfections in a vehicle's finish and restoring it to an, often times, better than new state. Due to incorrect washing, neglect, bad machine buffing jobs, etc., in the past the finish sometimes require more than just detailing. The **image III Paint Correction Products** gives the right product and the right buffing pad for the professional detailer. All **image III Paint Correction Products** are color matched to the recommended buffing pad.
